

Keith Primary School

Scotland

The new £40m Elgin Academy incorporates Keith Primary School and has a pupil capacity of over 1000. The accommodation comprises classrooms, a games hall, gym, fitness suite and dance studio.

On the single-storey primary school, System 8 Low Rise Curtain Walling was installed. A highly cost-effective, simple to fabricate glazing solution with clean, attractive external lines, System 8 is an optimum solution for expansive low rise glazed applications.

Fully compatible with System 17 Curtain walling, and installed across the project, the 4-20 thermally- broken casement window offers the advantages of polyamide thermal break technology in meeting the requirements of current building regulations.

In the education setting, System 10 commercial door answers a number of design questions. The system offers single / double-action pivot doors, in both standard and anti-finger trap forms and a fully rebated option with butt hinges is also available. Double and single door leaf options are included in the range and a variety of door jamb and stile formats offers the designer flexibility to achieve the entrance required.
